

Success Comes with a Price

Throughout the years all walks of life are met during the passing
Who claims to know the meaning of the truth for real understanding?
To stand so tall, yet fall so short with a narrow opening of awaiting limitation
There are many different parts to encounter before reaching success.

Each and every step has to be driven and learned to gain experience
While, every phase of the journey holds true
Wisdom cannot be brought and knowledge is not to be speculated
But, granted and earned through and through from a higher source.

The master plan is already written and set forth to embrace and appreciate.
Great pleasure of understanding how to accomplish set goals is to never give up
Somewhere along the line between ambition, determination, and dedication
A human with a memory of a young lifespan to cherish while walking the narrow path.

Holding on to chosen desires of the heart from many reaching for success.
Sleepless, stressful nights, and hard work, are just to name a few
Because success comes with a price, which is a valuable asset to share
This is the beginning of your true understanding of life for endless adventures
Congratulations! Your endless journey has just begun.
