Using Careers To Empower Lives

I love to go to school
Teachers love teaching…
They do a job that inspires others…
I say if you like that job go for it!
There is nothing can stop your dreams…
Say you got a job being a doctor…
You empower lives by helping the people you help…
And by treating them so they can feel better…
What do you want to be?
Whatever you are going to be…
Remember to empower not just your life…but those around you…
By always smiling and saying have a nice day…
Don't forget you can empower lives…
