

Robots are things

Robots are things
Made of AI
smart beings
It's easy as pie

Simple creations
Yet so complex
Truly revelations
It's honestly a flex

Spreading through cities
Full of innovation
You really can't pity
This worldwide domination

There's really no way
To stop these takeovers
They're breaking day
Sent robots to space called rovers

In the end let's be excited
This will be a joy
We will be united
Let us enjoy
