

## **Our Future is Bright!**

By Eliana Dillon, Grade 6

As the years pass, the world is growing,  
and all of the new opportunities are showing.  
While the advanced options are being created,  
Some other ideas are now outdated.  
Now that schools and colleges are available,  
More people are employed,  
And are now in jobs that are sustainable.  
Internships, scholarships, and job-shadowing is now accessible,  
And the chances largely are now unguessable.  
Because of these programs and with some luck,  
People are now developing jobs beyond the trailer and truck.  
So as the world continues to grow,  
We must always remember and know,  
That career development around Earth,  
Is very good, and has definite worth.  
Effort and materials, and other things too,  
But in the end, it helps everyone, even you.
